

CHAYAN DEV

Mobile Application Developer | Android (Kotlin) | PHP Web Developer

debchayan6@gmail.com | 01736 685252 | github.com/chaayaan | linkedin.com/in/chayandev

PROFESSIONAL SUMMARY

Dynamic final-year BSc Computer Science & Engineering student with hands-on experience in Android (Kotlin) mobile development and PHP web development, currently interning as Mobile Application Developer at Stamasoft Technologies.

Proficient in Kotlin, Java, REST API integration, PHP and MySQL, with expertise in database design, cPanel deployment, and CCNA/MTCNA networking fundamentals.

TECHNICAL SKILLS

Languages: Kotlin | Java

Mobile Dev: Android Studio | REST API | MVVM Architecture

Web Dev: PHP | Laravel | HTML | CSS | MySQL | cPanel · Domain & Hosting Management

Tools: Git | GitHub | JIRA | Android SDK

Methodologies: Agile Development | RESTful APIs | Version Control

PROFESSIONAL EXPERIENCE

Mobile Application Developer Intern | **Stamasoft Technologies, Chittagong**

Nov, 2025 – Present

- Develop Android applications using Kotlin, Java with REST API integration for mobile-backend communication.
- Collaborate with cross-functional development teams to build, test, debug, and improve application features across mobile and web platforms.
- Support debugging, testing, and performance improvement of existing mobile applications using Agile development methodologies.

PROJECTS

Business Management System – Rajaiswari — *PHP · MySQL · cPanel*

- Developed a multi-branch jewellery lab management suite with 7+ modules — billing, sales reporting, customer management, Tunch & hallmark reports, branch licences, accounts, and machine inventory.
- Implemented automated cron-based daily email reporting to stakeholders and managed hosting across 22+ branches.

SmartCart E-Commerce System — *Laravel · PHP · MySQL*

- Developed a full-stack e-commerce platform with authentication, product management, and order processing; designed admin dashboard with role-based access control. (Team of 4)

Job Finder Mobile Application — *Kotlin · Jetpack Compose · Firebase*

- Built an Android app connecting companies and job seekers using Firebase Authentication and Firestore with real-time sync for 2 user roles; implemented job posting and in-app direct application functionality.

Kirton Song – Android App — *Kotlin · Android Studio*

- Bengali kirtan song app featuring character-by-character typing animations, lyrics display, and a polished light-themed UI.

School Management System — *PHP · MySQL*

- Developed a web-based school management system covering 5 modules — student, teacher, records, admin, and scheduling — with normalised backend database schema and full CRUD operations.

EDUCATION

BSc in Computer Science & Engineering

Expected: November 2026

Premier University Chittagong, Bangladesh | Final Year
